ABOUT CARROT

Carrot is a very social kitty, who somehow manages to always be in the same room as his humans. He's curious, playful, and affectionate. He purrs at the slightest touch, and loves to be petted and brushed. He likes meeting new humans, and rightfully assumes that everyone will want to pet him. He is a total sweetheart, and has no behavioral or litterbox problems. Carrot needs to be in a home with other cats. He would dearly love it if he could continue to live with Pip and Squeak, the two cats...

Special Needs: Carrot is on daily medication for small-cell lymphoma. He is very cooperative about taking his medicine, and has no side effects. He's expected to live a long and healthy life.
